My Product

- This product is used to detect the level of toxicity in the air.

- We can detect the amount of toxicity through the colour of light the detector has

- This band can be tied anywhere on the hand and it has light weight.

- We have used a Gas sensor(MQ6) to detect the gas, Neopixel Ring 12, programmed it with Arduino Pro Mini and a 9V Battery.

- The cost of this project is about Rs.900.

MQ6 Gas Sensor

Here this sensor is used to detect the level of Toxicity in the Sewer Gas
